SEEKING OUTSTANDING CANDIDATES

Staff Environmental Scientist or Engineer

MUNDELL & ASSOCIATES, INC. (MUNDELL), a small, dynamic, Indianapolis-based earth and environmental consulting firm is seeking an outstanding candidate to fill the position of Staff Environmental Scientist or Engineer. Zero to four years (experience preferred but not required) of geological, geophysical or environmental engineering consulting experience. The ideal candidate should have a B.S. degree (M.S. for a preferred candidate) in a scientific or engineering earth science-related discipline from an accredited university. The capacity to become a Licensed Professional Geologist (LPG) or Professional Engineer (PE) is highly desirable. This position will play a key role in various projects by completing field and office activities including site assessments, compliance monitoring, reporting, data collection and analysis, remedial design, assisting with project management activities, and helping to assess and improve the environmental impact of various projects. This position offers an opportunity to gain hands-on experience while developing technical and project management experience through contributing to a variety of different projects in the environmental consulting industry.

Desirable skills include excellent familiarity with field data collection and mapping methods, industry software, quantitative and statistical analysis, data visualization, and outstanding oral and written communication. The candidate must demonstrate a proven ability to work independently, organize and manage multiple tasks and project assignments, and interact well with a multidisciplinary team.

WHO WE ARE

A small firm established in 1995, MUNDELL provides consulting services to small to medium commercial companies, Fortune 500 firms, municipalities, other engineering firms, and the legal community. MUNDELL senior personnel have acted as project engineers and scientists, project managers, project directors, senior technical consultants, and expert witnesses for numerous earth and environmental projects throughout the United States, Canada, Mexico, Puerto Rico, South America, Europe and Asia.

Our specialties include the quantitative stratigraphic, geochemical, geophysical and hydrogeological characterization of the subsurface; quantitative analysis and engineering design of remediation systems; groundwater modeling and contaminant transport analysis, and environmental and engineering geophysics.

OUR VALUES

MUNDELL personnel believe that the proper scientific or engineering analysis of any site communicated in easily understandable terms will provide its clients with the guidance and direction they need to accomplish their goals. We believe that our pleasant demeanor, our comfortable dress, our high level of enjoyment in what we do and how we do it, and our passion for providing a high-quality product creates an atmosphere in our work environment that is collaborative and attractive to those seeking employment.
